

## Key Benefits

- Single-shutter valve system for reliable functionality
- Integrated handle for user comfort and uniform compression
- Thin-walled compression bag allows for lung compliance and "feel"
- SafeGrip™ surface for secure handling in stressful environments
- M-Port allows sidestream measuring of etCO<sub>2</sub> or quick medication delivery without disconnecting the Ambu SPUR II from the ET tube
- Easy attachment of manometer and PEEP valve
- MR Conditional

## Ambu® SPUR® II

Ambu SPUR II provides users with exceptional tactile and visual feedback during resuscitation. The bag is highly responsive, with minimal mechanical resistance. Furthermore the characteristic design provides optimum stroke volume with perfect recoil.

Ambu Spur II is MR Conditional and can be used in the MRI environment according to the following conditions:

- Static magnetic field of 3.0 T or less
- Maximum spatial field gradient of 4,000 gauss/cm (40 T/m)

Ambu SPUR II is not intended to be in direct contact with a patient undergoing an MRI procedure.
