

New 24-Hour Blood Pressure Monitoring Service Available

FREE of charge for all medical card holders

Ask your Doctor today

65% of Irish people over the age of 50 suffer from high blood pressure. However, it can affect people of all ages and there may be no symptoms.

One measurement is insufficient as blood pressure varies throughout the day. A 24-hour measurement gives an accurate overall diagnosis.

You will be given a small light-weight device to wear which will measure your blood pressure throughout the day & night whilst you carry on with your day-to-day activities.

Our 24-hour device

We use the ErgoScan 24-hour blood pressure monitor provided by

MEDGUARD
