Clear & Simple DIGITAL Ovulation Test

The digital ovulation test für professional and private use.

More reliable than it would be to manage a cycle calendar as well as the measuring of the temperature in the morning, the digital ovulation test can help you with planning a pregnancy. You will get the test result after 3 minutes with a clear YES/NO indication and 99 % reliability.

You could get the test in a pack with 7 tests + measuring device or in a pack with 20 tests + measuring device. If you decide to try this test, your advantages would be:

- 99 %reliability
- Test result after 3 minutes with a clear indication
- Result stays on the display for 5 minutes
- Measuring device can be reused

Storage: 2 °C - 30 °C

Detection level up from 25 mIU/l LH

Suitable for professional and private use.

- The test reliably shows the 2 most fertile days.
- The digital display YES/NO responds within 3 minutes.

You will get the measuring device with 7 or 20 test strips. The tests can be replaced individually, the measuring device itself is multifunctional. The YES/NO display stays visible for 5 minutes.

Storage at 2 °C - 30 °C

Cut off: 25 IU/ml (LH)

HPRA Wholesalers authorisation No. W00426/00001
