100% MADE IN ITALY

MO00047
Blood collection/relax synchro armchair

CE

MO00047

BASIC CONFIGURATION

The armchair is made of metal with oval section, square and round. A 50x25x1.5 oval tubular was used for the legs; for the central frame a 30x30x1.5 square and for the cushions a round tube diam.25x1.5. The structure is completely painted with white epoxy powder. The top in high-density rubber is covered in fireproof (class 1 IM) coated fabric (skai). The synchronized adjustment of the two cushions is regulated by a gas spring operated by a comfortable handle placed behind the backrest. The inclination of the backrest is equal to about -5° in Trendelenburg position.

The armrests are known as articulated joints which guarantee a perfect inclination during their use; they can be adjusted in height and extracted by 180° rotation. There are four adjustable feet that embraces optimal stability.

TECHNICAL FEATURES

The construction materials are oval square and round tubular furniture for Uni 7947/81 and 8913, DIN furniture 2394, threaded bushes in AVP, plates in Fe.

The padded top has a base in wood material, the polyurethane foam padding is covered in fireproof fabric (skai, fake leather) class 1 fireproof Im.

The structure follows a process of phospho-degreasing, rinsing and application of the powder paint cured at 200°C. The colour is white Ral. 9003, its minimum thickness is 70/80 microns. The finish is glossy.
