

Universal Wipes

Alcohol free surface disinfection wipes for medical devices.

Sani-Cloth Universal Wipes

Cleans and disinfects in one

Effective against **NOROVIRUS** in... **2 minutes**

Sani-Cloth Universal Wipes

Cleans and disinfects in one

Ingredients: Didecylidimethyl ammonium chloride 0.450 %w/w, Surfactants 0.325 %w/w, Auxiliary 0.520 %w/w, Excipients 98.705 %w/w

- **100 Count Flow Wrap** Ref: XP00363
Wipe size: 280x200mm
- **200 Count Canister** Ref: XP00366
Wipe size: 200x 200mm Packaging: 6 case
- **225 Count bucket** Ref: XP00365
Wipe size: 300x245mm

Alcohol free surface disinfection wipes for medical devices.

Multipurpose

- Sani-Cloth Universal contains a skin friendly surfactant and disinfectant enabling Sanicloth Universal to clean and disinfect in one action.

Broad spectrum of kill in low contact times

- Sani-cloth Universal has been proven to be bactericidal, fungicidal, virucidal and tuberculicidal against the latest EN standards/surface tests. Testing has been at low contact times to ensure the products are effective in situ.

Cost Effective

- Sani-cloth Universal provides product standardisation and cost savings.

Additive to prevent surface or equipment damage

- Sanicloth Universal contains a specialist additive to the formulation which prevents surface and equipment damage. It is ideal for mattresses and most types of rubber, plastics and metals.

Product validation for in situ use

- All testing for micro, material compatibility, stability, dermatological, toxicity and period after opening (PAO) using extracted liquid. This provides confidence in the ability of the product to meet its label claims.

Convenience

- Sanicloth Universal is premixed, premeasured and convenient to use. This provides the assurance that it delivers the right concentration to disinfect. It avoids mixing errors, and activation waiting times for products mixed at point of use.
- Validated low drying times ensure devices are available for use within a shorter time period without compromising disinfection.
- Unique deep well lid prevents wipes from drying and the slimline canister provides greater convenience in use.

In hospital support with the unique Sanicare compliance program

- PDI provides free* in hospital support which includes, in house and on line training, qualitative and quantitative Audits (ATP), compliance materials and colour coded brackets which enable hospitals to meet both CQC requirements and epic 3 guidelines.
- The unique Sanicare compliance program enables quantifiable measurement which provides the visibility of compliance improvements and highlights areas of risk which need corrective action.
