

Lucina

Lucina delivers an all-in-one simulation experience. Designed to demonstrate both gravid and non-gravid scenarios, this wireless manikin comes with a fetus to teach proper prepartum, labor, delivery and postpartum care as well as a non-gravid abdomen for clinical situations unrelated to maternity.

Integrated with maternal-fetal physiological modeling, Lucina automatically reacts to medical interventions while the fetus cries upon delivery and senses the amount of force applied to its neck.

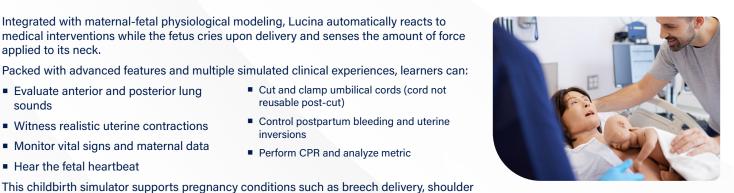

Packed with advanced features and multiple simulated clinical experiences, learners can:

dystocia and postpartum hemorrhage. Additional equipment is available to help teach the

- Evaluate anterior and posterior lung sounds
- Witness realistic uterine contractions
- Monitor vital signs and maternal data
- Hear the fetal heartbeat

all-fours birthing position.

- Cut and clamp umbilical cords (cord not reusable post-cut)
- Control postpartum bleeding and uterine inversions
- Perform CPR and analyze metric

DELIVERING AN IMMERSIVE EXPERIENCE

Expand the training with Microsoft HoloLens 2. The world's first augmented reality childbirth simulator, LucinaAR, can be paired with the Lucina manikin or used as a standalone tool to:

- Increase the understanding of childbirth and postpartum
- Improve knowledge through repeated self-paced learning
- Educate learners using minimal space

VALUABLE PREPARATION FOR QUALITY HEALTHCARE

covered, resulting in a true interprofessional education (IPE) experience for learners.

General Practitioners

Detect normal and abnormal maternal-fetal vitals with authentic heart, lung and fetal sounds.

Obstetricians

Train to care for true-to-life pregnancy scenarios with realistic birth canal, uterine contractions, fetus rotations and postpartum options.

Midwives

Sharpen skills on various birthing positions and the McRoberts maneuver for shoulder dystocia.

LUCINA

Technical Specifications

Dimensions: 69" H x 22" W x 15" D (175 cm x 56 cm x 38 cm) Weight: 111 lbs. (50 kg)

AC Input: 100-240V, 50/60 Hz, 2.3 A Internal batteries: 14.4V, lithium-ion, rechargeable

Maternal manikin battery life: 4 hours

Standard Equipment

Available in two skin tones:

Dimensions: 19" H x 6" W x 4.5" D

(48 cm x 15 cm x 11.5 cm) Weight: 5.5 lbs. (2.5 kg)

Fetus battery life: 7 hours

Birthing fetus

Three abdomens (1 for delivery, 1 for prepartum and postpartum, and 1 for nongravid scenarios)

Postpartum uterus Static cervices for vaginal exams Software-compatible tablet Wireless emulated patient monitor

Maestro operating software

Four patient profiles (3 maternal, 1 non-gravid)

10 simulated clinical experiences (SCEs)

- Normal delivery
- Instrumental vaginal delivery
- Fetal tachycardia (due to maternal pyrexia)
- Breech delivery
- Fetal central nervous system depression (due to narcotics administered to mother)
- (due to uterine atony)
- Maternal cardio-respiratory arrest
- Eclampsia
- Umbilical cord prolapse

One year of Premier warranty support and maintenance and option to renew

Electronic user guide

Female patient module with non-gravid abdomen and 5 SCEs

- Chronic heart failure exacerbation.
- Acute respiratory distress syndrome
- Sepsis with hypotension

- Shoulder dystocia
- Major postpartum hemorrhage

One Maestro Standalone license including both manual and modeled mode

- Brain attack with thrombolytic therapy
- Motor vehicle collision with hypovolemic shock

Instrumental delivery

■ Postpartum hemorrhage

Optional Equipment

Advanced OB/GYN Accessory Kit

- Leopold fetus and tub
- Inverted Uterus and SCE
- Set of 6 static cervix 0-90% effaced

Microsoft HoloLens 2 application for LucinaAR with 5 SCEs

- Normal delivery
- Breech delivery
- Shoulder dystocia delivery

Additional Maestro Standalone licenses

Additional battery and charger

Abdominal cover for all-fours birthing position (required for this position)

LearningSpace

Maternal Features

Airway and Breathing

Realistic upper airway

Positive pressure ventilation including bag-valve-mask ventilation

Advanced lungs with mechanical ventilation support, including patient-triggered modes

Airway management and ventilation

Supports endotracheal tubes, nasopharyngeal and oropharyngeal airways

Spontaneous breathing with chest excursion

* Feature is included with optional Advanced OB/GYN Accessory Kit.

Lung auscultation: anterior and posterior

Cardiovascular

Correct hand placement detection for chest compressions

Advanced CPR analysis (compression depth and rate, chest recoil, compression fraction, ventilation volume and rate)

Compliant with 2020 AHA BLS guidelines and 2021 ERC guidelines

Pacing, cardioversion and defibrillation with real equipment

NIBP by auscultation and palpation Heart sounds

Circulatory System

Electrocardiogram (ECG) monitoring posts for interface with real ECG monitor with a library of over 50 cardiac rhythms

12-lead dynamic ECG display Variable pulse strength

Dynamic bilateral pulses: carotid, radial, brachial and dorsalis pedis

Fetus

Fetal heart sounds (five locations based on fetal presentation)

Articulated fetal body and neck (with lateral neck movement), shoulders, elbows, hips and knees

Clinically accurate fetal size with tactile realism-50th percentile on the WHO growth chart

Fetal neck traction sensing Palpable fontanel and sagittal suture Fetal airway suctioning Programmable audible cry upon delivery

Predicted 1-minute and 5-minute Apgar scores based on fetal blood-gas values Umbilical cord that can be out and clamped (cord not rougable nost out)

Ombilical cord that can be cut and clamped (cord not reusable post-cut)		
Fluids		
Postpartum bleeding tank (1.8 L)	Bilateral IV arms	
Urinary catheterization with urine release	Epidural infusion	
Intrapartum		
Realistic palpable uterine contractions	Trendelenburg position with detection	

Controllable rate and duration of Shoulder dystocia with presentation of contractions turtle-sign Left lateral tilt with detection Vertex and breech delivery

Shoulder dystocia with presentation of turtle-sign

McRoberts maneuver with observable/software detectable pelvic tilt

Suprapubic pressure support and detection with palpable symphysis pubis

Supports delivery of posterior arm during shoulder dystocia

Zavanelli maneuver with detection C-section team training support Rubin II and Woods: Screw maneuvers to resolve shoulder dystocia

Forceps application Vacuum extraction

Intact/fragmented placenta with realistic color, texture and flexibility

	Integrated maternal-fetal physiological modeling	Realistic birth canal and vulva
	Perineum support with accurate fetal descent and rotation	Multiple birthing positions: lithotomy, sitting and all-fours
	Rectal suppository administration	Urgent obstetrical learning module

Postpartum

Postpartum hemorrhaging, including Class III hemorrhage Contracted and boggy uterus Uterine blood released upon massage Bimanual compression and uterine massage with detection and automatic

response Uterine reversion * Inverted postpartum uterus *

Intrauterine balloon insertion

Prepartum

Vaginal examinations for evaluation of the cervix, fetal station and position Static cervices represent various stages of dilation from closed to 5 cm and effacement from 0 to 90% 3

Epidural port with infusion and Leopold's maneuvers * aspiration

Speech

Prerecorded speech 2-way voice communication
